

# **VISITING PROFESSIONAL PROGRAMMES IN UK**

# DISCOVER YOUR PATH WITH PROFESSIONAL PROGRAM

Are you a healthcare professional seeking to broaden your horizons and gain invaluable experience in a renowned medical environment? Look no further! Our visiting Professional Programmes are tailor-made for individuals like you who wish to immerse themselves in clinical practice and witness the inner workings of a leading healthcare institution.

## WHY CHOOSE OUR VPPS?

Our VPPs have been carefully designed to cater to clinicians like you, whether you're a doctor, nurse, or allied health professional. We take pride in offering a comprehensive experience that maximizes your learning outcomes and personal growth.

## WHAT MAKES OUR VPPS UNIQUE?

Our programmes offer a diverse range of practice models, from observation to hands-on clinical experience. You can choose a duration that suits your needs, ranging from four weeks to 12 months. During your placement, you'll have the chance to:

- 01 Tailored Experience:** Our programmes range from four weeks to 12 months and can be customized based on your qualifications and experience.
- 02 Hands-on Learning:** From observation to hands-on clinical practice, our VPPs offer a wide range of practice models.
- 03 Clinical Exposure:** You'll participate in clinics, ward rounds, surgery observation, and even assist with clinical trials.
- 04 Research Collaboration:** Collaborate with our clinicians on research projects and multidisciplinary meetings.
- 05 Personalized Projects:** Engage in bespoke projects and attend educational study days to enhance your skills.

# WHAT WE OFFER

Our programmes offer a diverse range of practice models, from observation to hands-on clinical experience. You can choose a duration that suits your needs, ranging from four weeks to 12 months. During your placement, you'll have the chance to:

- Attend clinics and ward rounds
- Observe surgeries in both day care and main theatre settings
- Assist with clinical trials
- Collaborate with our clinicians on research projects during weekly multidisciplinary meetings
- Participate in bespoke projects
- Attend educational study days organized by relevant departments

# VISITING PROFESSIONAL PROGRAM IN UK

## INTERNATIONAL CLINICAL FELLOWSHIP

- Offers clinical training for international doctors in all specialties
- Sponsored by Ministry of Health, Government, hospital, clinical institute or national training body
- International Clinical Fellowship Program is offered over one or two years and we sponsor the GMC applications

## CLINICAL ATTACHMENT

- Unique and useful way for international doctors and medical graduates to get valuable experience
- Allows them to gain in-depth knowledge of medical processes and systems in the NHS
- Clinical attachments usually last between 12 to 48 weeks and all candidates should be GMC registered

## CLINICAL OBSERVERSHIP

- Created for clinicians who wish to observe clinical practice and experience the working of an NHS Hospital
- Programmes range from 12 weeks up to 1 year
- GMC registration is not required for Clinical Observership

## A UNIQUE LEARNING EXPERIENCE

We take pride in offering a unique learning experience that integrates visiting professionals within our clinical departments. You'll receive one-on-one supervision and guidance while working in the clinic or day-case environment, ensuring your learning and development needs are met. Regular meetings with your clinical supervisor will ensure your progress is on track.

# FOSTERING LIFELONG CONNECTIONS

Our Programmes promote two-way learning and the development of lifelong professional connections. We encourage an open and engaged culture among our team, facilitating mutual benefits from working alongside healthcare professionals from around the world.

## YOUR JOURNEY

At the end of your program, we conduct a comprehensive evaluation to gather feedback and improve our programmes continually. Upon completion, you'll receive a certificate to commemorate your experience with us.

Here's what some of our past participants had to say:

*"The programme provided me with comprehensive exposure to cardiovascular studies, ward rounds, clinics, interventional surgery, and more. The multidisciplinary team meetings allowed in-depth discussions resulting in diagnosis and treatment plans."*

- Doctor from **India**

*"I had a great learning experience with different teams, gaining valuable exposure to community nursing. The team was eager to share their experience and roles with me, providing a deeper understanding of nursing."*

- Nurse from **Singapore**

## EXPLORE OUR CLINICAL EXCELLENCE
